

## ANTI - LIME MORTAR PLASTISIZER-RETARDER

### DESCRIPTION

Transparent, resin-based liquid for the substitution of lime. Suitable for mortars that we need to extend the application time and improve the adhesion strength to the substrate.

Improves the workability of mortars and avoids the problems created by the use of lime.

### FIELDS OF APPLICATION

Suitable for :

- The manufacture of plaster.
- The preparation of masonry mortar.
- The preparation of mortars for tiling and marble fixing.

### ADVANTAGES - FEATURES

- Increases the adhesion strength to the substrate
- Slow down setting time.
- Improves workability.
- Reduces the cost of the final product.
- Avoids the problems created by the use of lime (e.g. lumps).
- Does not contain corrosive ingredients that destroys the metal components (e.g. corner beads).
- Increases final strengths of the mortars.

### APPLICATION

Initially the mix product with clean water. Then add the necessary quantity to the mortar under constant stirring.

### CONSUMPTION

- Plaster preparation: 0,20 - 0,25 kg/ bag cement.
- Masonry mortar preparation: 0,15 kg/bag of cement.

### PACKAGING

In plastic containers of 1- 5 and 20 kg. Life unlimited at dry environment in temperatures above 0 ° C.
